ALCO PREVENTION CANADA

## REDUCE CHEMICAL CONSUMPTION

The PAX-50 has been engineered to dispense the least amount of disinfectant, while ensuring maximum coverage, by misting the disinfectant to a fine droplet size.

We use the highest quality industrial grade nozzles to prevent clogging and to permit a comfortable spray distance of 36” to 48”.

## UNINTERRUPTED 4-HOUR RUN TIME

We have designed a powerful battery to maximize run time and to reduce the need to charge frequently.

The internal battery also eliminates the need to purchase and carry around additional external batteries and any external cumbersome charging docks and cables.

## HEALTH CANADA APPROVED DISINFECTANTS

The PAX-50 works with all water soluble disinfectants listed by Health Canada and proven as being effective in infection control and elimination of viruses and bacteria. The flexibility of choosing which water-soluble disinfectant to use for your intended application. Save up to 80% on disinfectant costs.

## COVERAGE & SPEED

The PAX-50 Handheld Electrostatic Sprayer covers up to 4,000 square feet with a single tank.

Disinfect an average sized room with the PAX-50 handheld electrostatic sprayer in under a minute. Uniform droplet size avoids streaking and troublesome large drops.

## MADE IN CANADA

The PAX-50 handheld electrostatic sprayer is proudly designed, engineered and manufactured in Canada.
